EDUCATION

AUG 2019 - Present **National University of Singapore** — Bachelor of Computing in
Computer Science (Honours) — GPA 4.94

JAN 2011 - NOV 2016 **NUS High School** — Diploma (Distinction), Major in Mathematics with
Honors in Biology and Chemistry

WORK EXPERIENCE

SAP — Full Stack Developer Intern (Machine Learning)

MAY 2020 - AUG 2020

- Developed tools for document information extraction (robotic process automation)
- Responsible for document template detection tool using NLP heuristics
- Wrote continuous integration tests for Jenkins pipeline
- Built mainly with python, deployed on Cloudflare in docker containers

National University of Singapore — Research attachment (Food Science)

2015-2016

- Studied the modification of fish gelatin to mimic mammalian gelatin in a 2 person team
- Published in Food Hydrocolloids (Elsevier)

Defence Science and Technology Agency — Research attachment (Computing)

2014

- Implemented algorithms to identify gender from voice recordings (independent work)
- Achieved >98.5% accuracy on Aurora 4 dataset

PROJECTS

SupperJio Telegram Bot — https://t.me/SupperJio_v2_bot

- Telegram bot designed to collate group orders, with over 1000 users
- Developed with NodeJS with PostgreSQL and cloud hosting
- Complete refactor of previous iteration to improve scalability
- Created innovative human-friendly menu format, a sub-specification of YAML

Folio — <https://folio-hnr.netlify.com/>

- User friendly Resume/Portfolio creation app with drag and drop features
- Developed on ReactJS with Rails/PostgreSQL backend, deployed on Heroku and Netlify

Mousehunt Autobot — <https://github.com/nicktohyu/Mousehunt-Autobot>

- Automated script to play the facebook game Moushunt, built in JavaScript and Ajax
- Intelligent and complex, able to complete quests and events
- User-customizable through an injected HTML menu, and stores persistent data

ACHIEVEMENTS

2020 Top 5% in google kickstart programming contest

2020 A+ grade for all computing coursework

2020 Tutor for "Programming Methodology 1" and "Data Structures and Algorithms"

2019 Top scorer for "Programming Methodology 1" in a class of 520 students

2015 Canadian Computing Competition 2015 (Distinction)

2014 Australian Informatics Competition 2014 (Perfect score)

Australian Informatics Olympiad 2014 (Gold)
