Class Size = Invited; Response Size = Responded; Response Rate = Response Ratio

A. GUIDELINES FOR INTERPRETING THE REPORT

The teacher evaluation report is for developmental purposes and is meant to help identify strengths and areas for improvement. Please consider the following recommendations that will aid in interpreting the results:

1. Examine the report by taking note of patterns in order to consider how best to act on the feedback your students have taken the time to provide. Use the reflection section at the end to reflect upon how you might act on the feedback.
2. These evaluations stem from student perception and thus constitute one source of evidence among others as to the quality of your teaching. Any response to the feedback should be based on the most representative results rather than on outlying responses.
3. Upon getting a general sense as to what has gone well, and which areas may require attention and improvement, it is important to drill down to the related questions. These questions can help guide future action if feedback from students suggest areas for improvement.
4. Keep both the likert scale and written comments in mind while reading through the report. High scores (4+) suggest student consensus indicating a strength. On the other hand, low scores (2-) should be considered as an area that requires immediate developmental focus based on student feedback.

D. STRENGTHS

What are TOH ZHEN YU, NICHOLAS's strengths?

Comments
He is good at explanation key concepts in the questions.
He is extremely clear about the content taught in this module, and he often times asks interesting questions for us to ponder over.
Ability to explain well. Keeps to the timing perfectly. Doesn't shy away from question. If he doesn't know something, he get backs to us later on, which I deeply appreciates. Cares deeply about student development and gives well meaning advise to his students.

E. AREAS FOR IMPROVEMENT

What improvements would you suggest to TOH ZHEN YU, NICHOLAS?

Comments
To give more prompt feedback for problem sets.
I think sometimes he tends to give out the answer a bit too fast, I do think that if we were given another one or two minutes in class to discuss about the algorithm we might be able to come up with the solution (just a trivial piece of advice).
NIL

F. SELF-REFLECTION

1. When comparing these results to the previous year's results, what areas have shown improvement?
2. What areas remain to be improved and what are the necessary steps / actions to do so?
3. Are there colleagues who could potentially guide me?
4. Are there issues that require departmental or institutional support?
